

Make Communication Clear

For people with hearing loss, Deaf British Sign Language users and lip readers

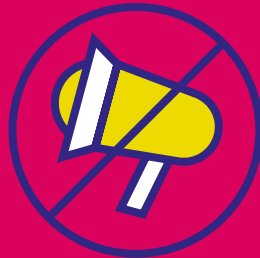

Ask me how I prefer to communicate

Where possible, use a transparent face mask, covering or visor

Find a space without too much background noise

Speak clearly at your usual speed

Do not shout

Stand face to face (from a safe distance) to allow lip-reading

Try re-phrasing your sentence using different words

Try writing it down or use a speech-to-text app
